

## Modular Multiphysics Simulation using VMAP

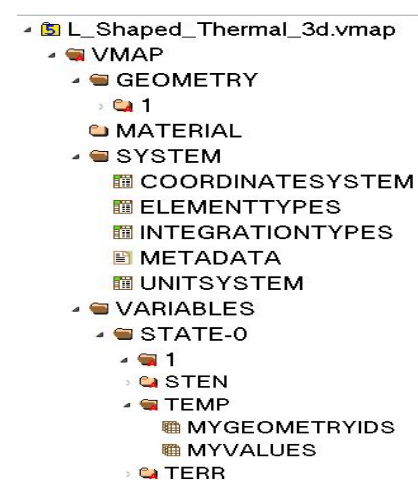

### ANSYS Wrapper as an ACT Plugin supports VMAP v.0.5.2

- *VMAP to ANSYS*
  - Mesh data
  - Unit systems
  - Coordinate System
  - Nodal coordinates
- *ANSYS to VMAP*  
Mesh data and state variables

### Diffpack from inuTech GmbH supports VMAP v.0.5.2

- Programming environment for numerical modelling and solution of PDEs
- *Diffpack2VMAP and VMAP2Diffpack Converter*  
(Meta information, coordinates, elements, state variables)

## Thermo-structural analysis of an L-shaped Beam
