

- **ESI Virtual Performance Solution** is the multi-domain virtual prototyping solution
- Non-linear implicit and explicit finite element solver
- *Single-Model – Multi-Analysis* concept
- Broad material modelling capabilities
- Fluid-structure interaction for compressible and incompressible fluids
- Fully integrated chaining capabilities to link manufacturing and performance analysis
- **VMAP files can be translated into ESI Result Files and are therefor available for the result import**
- **Customized solutions available based on ESI Visual-Process integration**
